

Ready to build.

Hello.

Every business operates differently and your vehicles should reflect that.

That's the idea behind CustomBox and CustomCage: bespoke solutions designed entirely around you. Whether you need enclosed storage, open cage designs, or a mix of both, each build starts with your vision. You tell us what you need, how you'll use it, and what matters most — and we'll engineer it to fit perfectly.

From housekeeping to groundskeeping, waste management to guest transport, the flexibility is endless. Both options are compatible with almost any vehicle in our range, giving you the freedom to adapt your fleet to suit every role on site.

It's about more than just adding storage or structure — it's about creating vehicles that work smarter, last longer, and make every task simpler.

We can't wait to see what you'll design next.

A handwritten signature in black ink that reads "Matthew". The signature is fluid and cursive, with a long horizontal stroke extending from the end of the name.

Matthew Patton
Sales Director

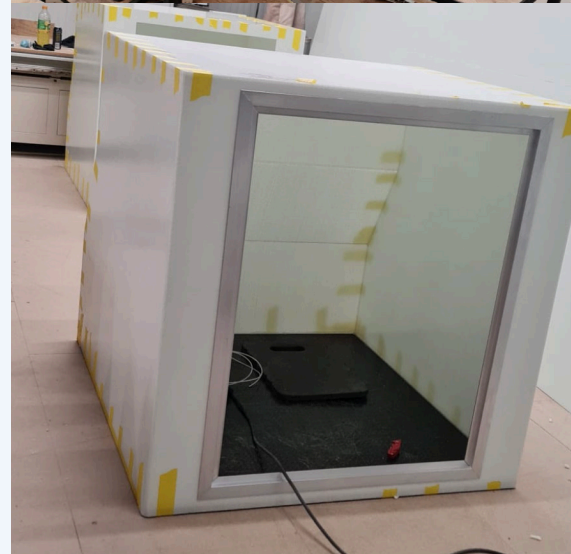

The art of accuracy.

Behind every CustomBox is a process defined by precision.

Using our advanced cutting technology, each panel is shaped to exact specifications, ensuring flawless accuracy and a perfect fit every single time. This isn't mass production; it's craftsmanship guided by innovation. Every cut, edge, and joint is made with care, ready to form the structure that will become your one-of-a-kind design.

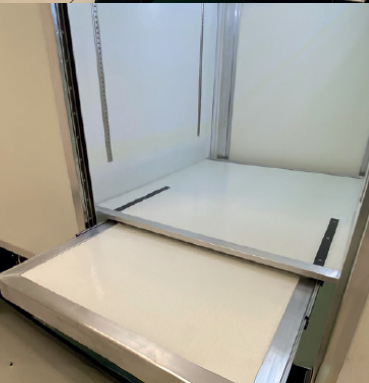

The beauty of this process lies in its flexibility. Whether you need compact storage, multiple compartments, or a completely bespoke layout, our cutting system can adapt to your requirements with millimetre precision. It's how we turn ideas into durable, professional-grade solutions that perform as well as they look.

From the first cut to the final assembly, quality is built into every stage — ensuring your CustomBox is as dependable as it is distinctive.

Built around you.

Choose any colour to match your brand or surroundings, add custom graphics, and incorporate intelligent features that make everyday use effortless, from ION Lithium-powered interior lighting and secure locking systems to sliding shelves and perfectly placed compartments.

Beneath the surface, every box is built for performance. The advanced honeycomb core design offers impressive strength while keeping weight to a minimum, improving energy efficiency and overall vehicle performance. Each structure is fully recyclable and produced without harmful substances, protecting both you and the environment.

To ensure lasting quality, every box can also be coated for flame-retardant, anti-static, and UV-resistant protection, extending its life, even in demanding conditions.

It's more than just a box, it's a reflection of how you work, crafted to your exact vision.

Your vision, in three simple steps.

1. Define its purpose.

Every great design starts with a conversation. We'll talk through how your box or cage will be used, whether it's for tools, luggage, housekeeping, or something completely unique. This stage is all about understanding your workflow and creating a layout that suits the way you work.

2. We build it, your way.

Once we know exactly what you need, our team gets to work. Each CustomBox or CustomCage is carefully engineered to match your vision using durable, lightweight materials built to last. From shelves and dividers to open spaces and access points, every detail is crafted with your purpose in mind.

3. Fit and finish.

When your build is complete, we'll fit it to your chosen vehicle and make sure everything looks, feels, and functions exactly as it should. The result? A seamless addition that enhances your vehicle's capability and keeps your operation running smoothly, day after day.

Designed to fit.

Built for every task.

Strong, smart, and endlessly adaptable — that's CustomCage.

From protecting drivers in demanding environments to transporting tools, equipment, or even loose materials, every cage is designed to do exactly what you need it to. Whether you're kitting out a ball picker, creating a mobile storage unit, or building a protective frame for heavy-duty work, CustomCage delivers reliability without compromise.

Whatever the challenge, there's a CustomCage for it because versatility is what we do best.
